

# Connect the Wires

## Objective:

Connect the **wires** to the correct **terminals**.

## Intro:

Uh oh! That last bit of turbulence resulted in a bundle of **wires** coming **unplugged**. Plug them back in quickly, but be sure to connect them to the right **terminals (plugs)**.

## How To?

**Step 1:** Pick a wire and identify its **color**.

**Step 2:** Plug the wire into the **terminal** next to the **LED light** of the **matching color**.

**Step 3:** Repeat until finished.
